International Appropriate Technology Student Techathon 28 November 2024 - 12 January 2025

What is Appropriate Technology?

"Appropriate Technology" is a movement advocating for an approach to the development and deployment of technology (in a broad sense, beyond digital/computer-based) that honors cultural sensitivity, maintains ecological balance and fosters economic sustainability.

What is the INAT Techathon?

The INAT Techathon is a **6-week virtual student competition** that provides an opportunity to design and build a project in accordance with the values of Appropriate Technology. Teams will have several weeks to design a detailed solution or construct a prototype of an original project idea. This year's theme is "Building Sustainable Rural and Urban Cities for Economic Growth, Enhancing Health and Eradicating Poverty".

Key Dates

- **November 28: Kickoff session**
We will frame the concept of Appropriate Technology, provide details about judging criteria, and answer questions from participants.
- **December 8: Team formation & registration deadline**
There will be opportunities in the week following the kickoff to find teams with similar project interests.
- **December 8 - January 12** – Teams will work on defining their project scope, and developing a detailed design or prototype. Mentors will be available to help teams clarify their idea, scope, and pitch presentations.
- **January 12: Project submission deadline**
Each team will record a presentation of their detailed design or prototype.
- **January 18: Award announcements**

Eligibility

- Any current **undergraduate or graduate students** are eligible to compete on a techathon team.

Teams

- Teams must consist of **between 2 and 6 students**
- Be **multidisciplinary, multi-institution**, and ideally multi-region.
- One of the goals of the techathon is to foster cross-regional collaboration, so teams **must include participants enrolled in school in at least two countries**.

Projects

- Projects may encompass **any area of technology**, including but not limited to:
 - ★ Environment and Agriculture
 - ★ Water and Sanitation
 - ★ Health
 - ★ Energy and Materials
 - ★ Manufacturing and Construction
 - ★ Cities, Space, and Infrastructure

Prizes

All Around 1st Place Team	\$1,200
All Around 2nd Place Team	\$900
Area-specific prizes (up to 3 teams)	\$600 (per prize)

Detailed judging criteria and prize targets will be presented during the techathon kickoff session.
